PROFILE

Product Designer with 6+ years of experience designing enterprise software used by Fortune 100 companies. Specialises in transforming complex, data-heavy workflows into intuitive, scalable interfaces, spanning design systems, charts, and AI-integrated planning tools. Proven ability to own end-to-end design across research, prototyping, delivery, and cross-functional alignment in fast-paced, global product teams.

CORE SKILLS & TOOLS

Design & Interaction	Product Design, Interaction Design, Rapid Prototyping, Wireframing, High-Fidelity UI
Specialisations	Data-Intensive UI/UX, Design Systems, Iconography, Accessibility (WCAG 2.1), AI-Integrated Workflows
Research & Strategy	User Research, Usability Testing, Systems Thinking, Stakeholder Alignment, Agile Collaboration
Tools	Figma, Figma Make, Framer, Webflow, Illustrator, After Effects, Photoshop, HTML/CSS Basics, GenAI Tools

WORK EXPERIENCE

o9 Solutions

May 2024 – Present, Bangalore

Product Designer 2

About o9: It's an AI-powered enterprise planning platform serving global Fortune 100 clients, handling large-scale data for real-time decision-making in supply chain and operations.

Role & Impact: I work across core platform areas like Charts, IGC, and Admin/Configuration, designing data-heavy workflows, improving interaction patterns, and contributing to platform-wide UI modernisation and AI usability.

Contributions:

- **Designed and improved Charts experiences** across planning modules, enhancing readability, filtering, annotation logic, accessibility, and interaction behaviours for large datasets.
- Led UX for **Gantt charts**, defining consistent patterns for data visualisation, cross-widget interactions, and planner workflows.
- Owned multiple **admin-side configuration flows**, improving clarity and reducing setup complexity for tenants, reports, dashboards, widgets etc.
- Redesigned the **filtering experience** across data-heavy screens, enabling faster discovery, better grouping, and more intuitive parameter control.
- Conducted **user research and workflow studies** with planners and business teams to identify friction, evaluate navigational patterns, and decide the right design approach before high-fidelity work. And also carried out testing of finished designs.
- Co-led platform **UI modernization**, developing modular components, standardizing interaction patterns, and aligning visuals for consistency across products.
- Directed the complete **800+ icon revamp**, defining iconographic rules, semantics, and usage guidelines for the platform wide design system.
- Led **WCAG 2.1 accessibility** reviews, fixing color contrast, focus states, keyboard interactions, and screen-reader semantics for core workflows.
- Collaborated closely with **PMs, PMM, external marketing teams, engineering, QA, and customer-facing stakeholders**, ensuring alignment of UX, messaging, and functional expectations across releases.

LeadSquared

Dec 2022 – Apr 2024, Bangalore

Product Designer

About Lsq: LeadSquared is a high-scale sales and marketing automation platform for enterprises in sectors like BFSI, EdTech, and healthcare, managing multi-channel customer interactions.

Role & Impact: Designed core experiences for the Service product, building it from the ground up and shaping how service agents create, manage, and resolve customer tickets across multiple channels.

Contributions:

- Designed the **Service** application from scratch, enabling service agents to create tickets manually or handle automatically generated tickets from email, chat, calls, WhatsApp, and other integrated systems.
- Defined the end-to-end ticketing workflow, focusing on timely resolution, escalation logic, SLA visibility, and agent productivity.
- Designed a detailed, multi-tab **Ticket Detail View** where agents could access conversations, files, knowledge base articles, customer history, related tickets, and all contextual information without losing focus.
- Worked on the **Customer 360 dashboard**, consolidating all relevant customer data into a clean, action-oriented layout that could be used out-of-the-box or configured based on organisational needs.
- Improved the overall resolution workflow by bringing all necessary insights and actions into a single, consistent interface for agents.
- Led design for a **conversational ticket** creation and resolution flow, aligning with the shift toward faster, chat-based service expectations and reducing wait times for customers.
- Collaborated with PMs, engineering, QA, and customer success teams to validate flows and ensure smooth implementation across modules.

West Pharmaceutical Services

Jan 2020 – Dec 2022, Bangalore

Associate UX Designer

About West: West is a global leader in injectable drug packaging and medical devices, with a digital ecosystem supporting operations for 15,000+ employees across 50+ locations.

Role & Impact: Designed internal enterprise tools used globally, focusing on workflow clarity, usability, and consistency across applications within West's internal ecosystem.

Contributions:

- Designed internal enterprise applications used by **15,000+ global employees**, improving clarity and reducing friction in daily workflows.
- Contributed to the **e-commerce platform redesign**, simplifying navigation, catalog structure, and purchase flows for complex product and pricing combinations.
- Designed several internal productivity tools, including **SharePoint portals**, **booking systems**, and **request workflows**, ensuring alignment with West's internal processes.
- Improved consistency and usability of internal UI patterns by collaborating with senior designers.
- Got experience in HTML/CSS when I worked on frontend of the internship project and was part of the development team as well.

EDUCATION

B.Tech in Computer Science, Vellore Institute of Technology (VIT) 2016 – 2020

RECOGNITIONS

- Won **MIT Covid-19 Hackathon**, selected from global submissions for innovative design-led solution.
- Won internal **Design Contest at LeadSquared**, recognised for design excellence across the product team.
